

Sustainable Raw Materials Policy

As an international ODM / OEM industrial computer manufacturer, Ennoconn Corporation is committed to sustainable development through innovative technology, providing one-stop services in R&D, design, manufacturing and sales. In order to implement the sustainable strategy of “Green Technology Solutions”, Ennoconn Corporation plans to introduce product lifecycle assessment and formulate performance metrics to examine the negative impacts on the environment, society, and governance at each stage of the product life cycle, which will be reported to the Board of Directors on a regular basis. Ennoconn Corporation actively adopts sustainable procurement guidelines and cooperates with subsidiaries, suppliers and strategic partners, and committing to prioritize the procurement of raw materials that minimize the negative impact on sustainability and to increase the proportion of sustainable raw materials in our products, and to implement the following commitments together.

1. Increase the use of recycled raw materials.

Ennoconn Corporations plans to introduce product life cycle assessment (LCA), using recyclable raw materials at the resources according to the nature of the product, and continuously increasing the proportion of recycled raw materials to minimize the potential negative impact on the environment; and at the end of life, the plan is to track the use of recycled raw materials to ensure the quality and durability of the raw materials and to minimize the waste of resources.

2. Comply with Laws and Regulations, Increase the use of third-party verified raw materials.

Ennoconn Corporation complies with domestic and international regulations and directives on the control of hazardous substances, prioritizes cooperation with suppliers that do not use conflict minerals, comply with RoHS, WEEE, and other governmental and regional laws and regulations on pollution prevention and waste disposal, and increases the use of third-party certified and reused raw materials to enhance the design and

management of green products.

3. Reducing the impact of raw materials on biodiversity.

Ennoconn Corporation committed to biodiversity and no deforestation, avoid to procure raw materials from sites where containing globally or nationally important biodiversity sites, and protect biodiversity and conserve land forest to minimize environmental and ecological impacts.

4. Supply chain human rights due diligence.

Ennoconn Corporation plans to conduct human rights due diligence on suppliers to understand more the potential impact risks of raw materials on the environment, society and governance and in order to establish risks management mechanisms, mitigation and prevention measures.

5. Enlarge positive impacts on sustainable supply chain.

Ennoconn Corporation encourages subsidiaries, suppliers and strategic partners to comply with this commitment together, In order to minimize the risks and impacts associated with raw materials on sustainability, to collaborate and share the best practices with external stakeholders for sustainable raw materials and to provide support and resources to help suppliers achieve the common goals.

6. Employees training and stakeholder's communication.

Ennoconn Corporation provides regular training for employees to raise their awareness of the sustainable raw materials policy, to ensure that each employee understands and implements the Ennoconn Corporation's sustainable development strategy, and to strengthen stakeholder communication to reveal the progress and challenges of the implementation of this policy.
